# **Academy Ambassador Programme**

**Promoting Certification,  
Competence & Networking**

**World Institute for  
Nuclear Security**

**Have you achieved  
certification through the  
WINS Academy Programme?**

**Are you ready to promote  
certification to other  
professionals working in  
nuclear and radioactive  
source security?**

**Become a WINS Academy  
Ambassador**

# About the WINS Academy Ambassador Programme

## Completing the WINS Academy

Programme results in recognition as either a Certified Nuclear Security Professional (CNSP) or a Certified Radioactive Source Security Professional (CRSP).

## The WINS Academy Ambassador

programme provides an additional opportunity for you to promote the value of certification within your organisation, country, region and professional networks.

## Institutional support

To become a WINS Academy Ambassador, you need agreement and support from your institution.

## How long is the role for?

Ambassadors are appointed for a two-year term. This period can be reduced or extended by agreement between you, WINS and your institution.

# Exclusive WINS Academy Ambassador Benefits

## Events

Two priority invitations per year for funded participation in WINS events and workshops

## One-on-one

A one-on-one security briefing with WINS security experts on a quarterly basis

## Awards

Funded invitation to the WINS Academy Ambassador annual event, including awards for notable achievements

## Connections

The global network of WINS Academy Ambassadors and Alumni

## Network

Contacts across broader networks involved in the sector, including INMM and WiN

## Tools

Resources to effectively promote the Academy, including outreach and communication products

## Benefits for your institution

### WINS will:

**Promote** your organisation on the WINS website as an institutional supporter of the Ambassador Programme.

**Highlight** the commitment of your institution to certification, competence and professional development.

**Recognise** the commitment of your institution to excellence in security management.

*"Upskilling yourself by undertaking a WINS course is extremely beneficial as it means you have the competence and confidence required to strive in the nuclear security field. It doesn't matter which module you undertake, certification with WINS will enhance any CV, boosting your skills and career."*

Iain B, United Kingdom

## Benefits for you

### Support

Institutional support and recognition of your certified status by your employer

### Advancement

Promotion of your certification within your organisation or institution can have a positive impact on your career

### Reputation

Gain recognition of your certification achievement and your status as a WINS Academy Ambassador within your country

### Recognition

Be recognised within the global community of practitioners through WINS publications, newsletters and website posts

### Partnership

Access to broader networks

## What do we expect from each WINS Academy Ambassador?

### Promote

As an Academy Ambassador you agree to promote the WINS Academy Programme within your institution and among your professional network and within your country and region.

### Target

WINS will agree with you a set of targets and rewards as part of your WINS Academy Ambassador role.

### Strengthen

Actively contributing to the Ambassador Platform, leading discussions on forums and contributing to publications/blogs with full recognition of authorship.

### Outreach

Connect with relevant individuals in your own country/region for workshops, training and other events.

## How do you apply to become a WINS Academy Ambassador?

You will need to complete the WINS Academy Ambassador online application form, available [here](#).

We value inclusion and diversity, so please indicate your gender and geographical location in your application. WINS Academy Alumni from all backgrounds are encouraged to apply.

If we offer you the role of WINS Academy Ambassador, we will be in touch to finalise the arrangement between you, your institution and WINS.

*"I recommend WINS Academy certification to all staff and professionals in the nuclear safety and security industry as a basic requirement for self-development and overall operational improvement in their organisations."*

Jessica F, Canada
